

COMING SOON!

Substance Use Disorders Module

This Work2BeWell Substance Use Disorder module focuses on understanding and talking openly about substance use disorders. It uses a prevention lens to recognize risk factors and choices that can make an individual more susceptible to a disorder. It includes examples and information that are geared to early identification, risky behaviors, and how best to get help when it's needed. A preview of what will be covered:

- Introduction to important language to guide our learning
- Understanding Use Disorders and Substance Misuse
- Defining Addiction
- Understanding the Risks of Substance Misuse
- Identifying the Signs & Symptoms of Substance Misuse
- Identifying what you can do to keep yourself safe
- Action you can take to support others

Watch this page for the new module and resources to be released by the end of the year!
